Joyce,

There will be new clean areas. We plan to create maps at the completion updating all areas that are "clean". The native fill referenced is only placed at that area temporarily, that material is just being staged until we have enough to haul away. All native soil that is disturbed is being hauled away.

Thanks,

Mike Shepherd

Hi Mike - I had envisioned you making new maps at the conclusion of this project so that future project managers would know where there is clean fill and where there is still potentially contaminated soil. (I assume that the references in the reports to "native fill" mean potentially contaminated soil).

Will there be any "clean" areas, or will future projects just have to assume everything could be potentially contaminated?

Thanks!

Joyce & Craig,

Attached are the reports for the week of February 13, 2012.

All air monitoring results came back negative.

Please let me know if you have any questions.

Thanks,

Mike Shepherd
